

**SAFETY DATA SHEET**13204S v9.1  
en/CA**1. Identification of the substance/mixture and of the company/undertaking**

<b>Product name</b>	Aluminum Metal Cleaner	
<b>Product code</b>	13204S	Formula date: 2005-07-05
<b>Intended use</b>	Cleaning agent for professional use	
<b>Supplier</b>	Axalta Coating Systems Canada Company 408 Fairall Street CA Ajax, ON L1S 1R6	
<b>Manufacturer</b>	Axalta Coating Systems, LLC Applied Corporate Center 50 Applied Bank Boulevard, Suite 300 US Glen Mills, PA 19342	
<b>Telephone</b>	Product information	(800) 668-6945
	Medical emergency	(855) 274-5698
	Transportation emergency	(800) 424-9300 (CHEMTREC)
<b>Chemical Family</b>	No data available.	

**2. Hazards identification**

This preparation is hazardous per the following GHS criteria

**GHS-Classification**

Flammable liquids	Category 2
Skin corrosion/irritation	Category 1B
Serious eye damage/eye irritation	Category 2A
Corrosive to metals	Category 1

Endpoints which are "not classified", cannot be classified or are not applicable are not shown.

**GHS-Labeling**

Hazard symbols

Signal word: Danger

Hazard statements

- Combustible liquid.
- May be corrosive to metals.
- Causes severe skin burns and eye damage.
- Causes serious eye irritation.

Precautionary statements

- Do not breathe dust or mist.
- Wear protective gloves/protective clothing/eye protection/face protection.
- IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.
- IF INHALED: Remove person to fresh air and keep comfortable for breathing.
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- Immediately call a POISON CENTER/doctor.
- Specific treatment (see supplemental first aid instructions on this label).

## SAFETY DATA SHEET

13204S v9.1  
en/CA

If eye irritation persists: Get medical advice/ attention.  
Absorb spillage to prevent material damage.  
Store in a well-ventilated place. Keep cool.  
Store locked up.  
Store in corrosive resistant/ .? container with a resistant inner liner.  
Dispose of contents/container in accordance with local regulations.  
Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.  
Keep only in original packaging.  
IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower.

### Other hazards which do not result in classification

Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

### The following percentage of the mixture consists of ingredient(s) with unknown acute toxicity:

0 %

## 3. Composition/information on ingredients

mixture of solvents

### Components

CAS-No.	Chemical name	Concentration
111-76-2	Ethylene glycol monobutyl ether	10 - 30%
7664-38-2	Phosphoric acid	10 - 30%
112-34-5	Ethanol, 2-(2-butoxyethoxy)-	1 - 5%

Actual concentration ranges withheld as a trade secret.  
Non-regulated ingredients 50 - 60%

## 4. First aid measures

### Eye contact

Remove contact lenses. Irrigate copiously with clean, fresh water for at least 15 minutes, holding the eyelids apart. Seek medical advice.

### Skin contact

Do NOT use solvents or thinners. After contact with skin, take off immediately all contaminated clothing, and wash immediately with plenty of Previn® or water.

### Inhalation

Avoid inhalation of vapour or mist. Move to fresh air in case of accidental inhalation of vapours. If breathing is irregular or stopped, administer artificial respiration. If unconscious place in recovery position and seek medical advice. If symptoms persist, call a physician.

### Ingestion

If swallowed, seek medical advice immediately and show this safety data sheet (SDS) or product label. Do NOT induce vomiting. Keep at rest.

### Most Important Symptoms/effects, acute and delayed

#### Inhalation

May cause nose and throat irritation. May cause nervous system depression characterized by the following progressive steps: headache, dizziness, nausea, staggering gait, confusion, unconsciousness. Reports have associated repeated and prolonged overexposure to solvents with permanent brain and nervous system damage.

## SAFETY DATA SHEET

13204S v9.1  
en/CA

### Ingestion

May result in gastrointestinal distress.

### Skin or eye contact

May cause irritation or burning of the eyes. Repeated or prolonged liquid contact may cause skin irritation with discomfort and dermatitis.

### Indication of Immediate medical attention and special treatment needed if necessary

No data available on the product. See section 3 and 11 for hazardous ingredients found in the product.

## 5. Firefighting measures

### Suitable extinguishing media

Universal aqueous film-forming foam, Carbon dioxide (CO<sub>2</sub>), Dry chemical

### Extinguishing media which shall not be used for safety reasons

High volume water jet

### Hazardous combustion products

CO, CO<sub>2</sub>, smoke, and oxides of any heavy metals that are reported in "Composition, Information on Ingredients" section.

### Fire and Explosion Hazards

No data available

### Special Protective Equipment and Fire Fighting Procedures

Full protective flameproof clothing should be worn as appropriate. Wear self-contained breathing apparatus for firefighting if necessary. In the event of fire, cool tanks with water spray. Do not allow run-off from fire fighting to enter public sewer systems or public waterways.

## 6. Accidental release measures

### Procedures for cleaning up spills or leaks

Ventilate area. If heated above the flashpoint, remove sources of ignition. Prevent skin and eye contact and breathing of vapor. Wear a properly fitted air-purifying respirator with organic vapor cartridges (NIOSH approved TC-23C), eye protection, gloves and protective clothing. Confine, remove with inert absorbent, and dispose of properly.

### Environmental precautions

Do not let product enter drains. Notify the respective authorities in accordance with local law in the case of contamination of rivers, lakes or waste water systems.

## 7. Handling and storage

### Precautions for safe handling

Observe label precautions. Keep away from heat, sparks and flame, static discharge and other sources of ignition. When heated above its flash point, this must be handled as if it were a flammable liquid. Close container after each use. Do not transfer contents to bottles or unlabeled containers. Wash thoroughly after handling and before eating or smoking. If material is a coating: do not sand, flame cut, braze or weld dry coating without a NIOSH approved air purifying respirator with particulate filters or appropriate ventilation, and gloves. Combustible dust clouds may be created where operations produce fine material (dust). Avoid formation of significant deposits of material as they may become airborne and form combustible dust clouds. Build up of fine material should be cleaned using gentle sweeping or vacuuming in accordance with best practices. Cleaning methods (e.g. compressed air) which can generate potentially combustible dust clouds should not be used.

### Advice on protection against fire and explosion

Solvent vapours are heavier than air and may spread along floors. Vapors may form explosive mixtures with air and will burn when an ignition source is present. Always keep in containers of same material as the original one. Never use pressure to empty container: container is not a pressure vessel. The accumulation of contaminated rags may result in spontaneous combustion. Good

## SAFETY DATA SHEET

13204S v9.1  
en/CA

housekeeping standards and regular safe removal of waste materials will minimize the risks of spontaneous combustion and other fire hazards.

### Storage

#### Requirements for storage areas and containers

Observe label precautions. Store in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. No smoking. Prevent unauthorized access. Containers which are opened must be carefully resealed and kept upright to prevent leakage.

#### Advice on common storage

Store separately from oxidizing agents and strongly alkaline and strongly acidic materials.

## 8. Exposure controls/personal protection

### Engineering controls and work practices

Provide adequate ventilation. This should be achieved by a good general extraction and -if practically feasible- by the use of a local exhaust ventilation. If these are not sufficient to maintain concentrations of particulates and solvent vapour below the OEL, suitable respiratory protection must be worn.

### National occupational exposure limits

CAS-No.	Chemical name	Source	Time	Type	Value	Note
111-76-2	Ethylene glycol monobutyl ether	OSHA	8 hr	TWA	50 ppm	Skin
7664-38-2	Phosphoric acid	ACGIH	15 min	STEL	3 mg/m <sup>3</sup>	
		ACGIH	8 hr	TWA	1 mg/m <sup>3</sup>	
		OSHA	8 hr	TWA	1 mg/m <sup>3</sup>	
112-34-5	Ethanol, 2-(2-butoxyethoxy)-	ACGIH	8 hr	TWA	10 ppm	

### Glossary

CEIL	Ceiling exposure limit
STEL	Short term exposure limit
TWA	Time weighted average
TWAE	Time-Weighted Average

### Protective equipment

Personal protective equipment should be worn to prevent contact with eyes, skin or clothing.

### Respiratory protection

Do not breathe vapors or mists. Wear a properly fitted air-purifying respirator with organic vapor cartridges (NIOSH approved TC-23C) and particulate filter (NIOSH TC-84A) during application and until all vapors and spray mists are exhausted. In confined spaces, or in situations where continuous spray operations are typical, or if proper air-purifying respirator fit is not possible, wear a positive pressure, supplied-air respirator (NIOSH TC-19C). In all cases, follow respirator manufacturer's directions for respirator use. Do not permit anyone without protection in the painting area.

### Eye protection

Desirable in all industrial situations. Goggles are preferred to prevent eye irritation. If safety glasses are substituted, include splash guard or side shields.

### Skin and body protection

Neoprene gloves and coveralls are recommended.

### Hygiene measures

Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.

### Environmental exposure controls

Do not let product enter drains.

## SAFETY DATA SHEET

13204S v9.1  
en/CA

## 9. Physical and chemical properties

### Appearance

**Form:** liquid      **Colour:** clear

Flash point	81 °C	
Lower Explosive Limit	1.1 %	
Upper Explosive Limit	10.6 %	
Evaporation rate	Slower than Ether	
Vapor pressure of principal solvent	0.2 hPa	
Solubility of Solvent In Water	completely miscible	
Vapor density of principal solvent (Air = 1)	0.6	
Approx. Boiling Range	100 °C	
Approx. Freezing Range	-70 – 21 °C	
Gallon Weight (lbs/gal)	9.5	
Specific Gravity	1.14	
Percent Volatile By Volume	82.43%	
Percent Volatile By Weight	70.50%	
Percent Solids By Volume	17.57%	
Percent Solids By Weight	29.50%	
pH (waterborne systems only)	No data available.	
Partition coefficient: n-octanol/water	No data available	
Ignition temperature	210 °C	DIN 51794
Decomposition temperature	Not applicable.	
Viscosity (23 °C)	Not applicable.	ISO 2431-1993

Does not sustain combustion.

## 10. Stability and reactivity

### Stability

Stable

### Conditions to avoid

Stable under recommended storage and handling conditions (see section 7).

### Materials to avoid

None reasonably foreseeable.

### Hazardous decomposition products

The product contains components which at higher temperatures can release oxides of phosphorus. When exposed to high temperatures may produce hazardous decomposition products such as carbon monoxide and dioxide, smoke, oxides of nitrogen.

### Hazardous Polymerization

Will not occur.

### Sensitivity to Static Discharge

If heated above the flash point, solvent vapors in air may explode if static grounding and bonding is not used during transfer of this product.

## SAFETY DATA SHEET

13204S v9.1  
en/CA

### Sensitivity to Mechanical Impact

None known.

## 11. Toxicological information

### Information on likely routes of exposure

#### Inhalation

May cause nose and throat irritation. May cause nervous system depression characterized by the following progressive steps: headache, dizziness, nausea, staggering gait, confusion, unconsciousness. Reports have associated repeated and prolonged overexposure to solvents with permanent brain and nervous system damage.

#### Ingestion

May result in gastrointestinal distress.

#### Skin or eye contact

May cause irritation or burning of the eyes. Repeated or prolonged liquid contact may cause skin irritation with discomfort and dermatitis.

### Delayed and immediate effects and also chronic effects from short and long term exposure:

#### Acute oral toxicity

not hazardous

#### Acute dermal toxicity

not hazardous

#### Acute inhalation toxicity

not hazardous

% of unknown composition: 0 %

#### Skin corrosion/irritation

Ethylene glycol monobutyl ether	Category 2
Phosphoric acid	Category 1B

#### Serious eye damage/eye irritation

Ethylene glycol monobutyl ether	Category 2A
Ethanol, 2-(2-butoxyethoxy)-	Category 2A

#### Respiratory sensitisation

Not classified according to GHS criteria

#### Skin sensitisation

Not classified according to GHS criteria

#### Germ cell mutagenicity

Not classified according to GHS criteria

#### Carcinogenicity

Not classified according to GHS criteria

#### Toxicity for reproduction

Not classified according to GHS criteria

## SAFETY DATA SHEET

13204S v9.1  
en/CA

### Target Organ Systemic Toxicant - Single exposure

Not classified according to GHS criteria

### Target Organ Systemic Toxicant - Repeated exposure

Not classified according to GHS criteria

### Aspiration toxicity

Not classified according to GHS criteria

### Numerical measures of toxicity (acute toxicity estimation (ATE),etc. )

No information available.

### Symptoms related to the physical, chemical and toxicological characteristics

Exposure to component solvents vapours concentration in excess of the stated occupational exposure limit may result in adverse health effect such as mucous membrane and respiratory system irritation and adverse effect on kidney, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases, loss of consciousness. Through skin resorption, solvents can cause some of the effects described here. Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in non-allergic contact dermatitis and absorption through the skin. The liquid splashed in the eyes may cause irritation and reversible damage.

## 12. Ecological information

There are no data available on the product itself. The product should not be allowed to enter drains or watercourses.

## 13. Disposal considerations

### Provincial Waste Classification

Check appropriate provincial and local waste disposal regulations for proper classifications.

### Waste Disposal Method

Do not allow material to contaminate ground water systems. Incinerate or otherwise dispose of waste material in accordance with Federal, State, Provincial, and local requirements. Do not incinerate in closed containers.

## 14. Transport information

### International transport regulations

#### IMDG (Sea transport)

UN number: 1805  
Proper shipping name: PHOSPHORIC ACID, SOLUTION

Hazard Class: 8  
Subsidiary Hazard Class: Not applicable.  
Packing group: III  
Marine Pollutant: no

#### ICAO/IATA (Air transport)

UN number: 1805  
Proper shipping name: PHOSPHORIC ACID, SOLUTION

Hazard Class: 8  
Subsidiary Hazard Class: Not applicable.  
Packing group: III

#### TDG

UN number: 1805  
Proper shipping name: PHOSPHORIC ACID, SOLUTION

**SAFETY DATA SHEET**13204S v9.1  
en/CA

Hazard Class: 8  
 Subsidiary Hazard Class: Not applicable.  
 Packing group: III

**Matters needing attention for transportation**

Confirm that there is no breakage, corrosion, or leakage from the container before shipping. Be sure to prevent damage to cargo by loading so as to avoid falling, dropping, or collapse. Ship in appropriate containers with denotation of the content in accordance with the relevant statutes and rules.

**15. Regulatory information****TSCA Status**

In compliance with TSCA Inventory requirements for commercial purposes.

**DSL Status**

All components of the mixture are listed on the DSL.

**Photochemical Reactivity**

Non-photochemically reactive

**Regulatory information**

CAS #	Ingredient	EPCRA					313	CERCLA RQ(lbs)	CAA HAP
		302	TPQ	RQ	311/312				
111-76-2	Ethylene glycol monobutyl ether	N	NR	NR	A,C,F	Y	NR	N	
7664-38-2	Phosphoric acid	N	NR	NR	N	N	5,000	N	
112-34-5	Ethanol, 2-(2-butoxyethoxy)-	N	NR	NR	A,C,F,N,P,R	Y	NR	Y	

**Key:**
